HYACINTHS IN DISTINCT COLOURS.

FOR BEDS OR BORDERS.

Cannot be too strongly recommended to all admirers of spring gardening. The varieties selected, in the different colours, are such as will bloom at one time, and produce a display so rich and varied, combined with delicious perfume, that no other spring flower can equal.

HYACINTHS, ROMAN.

Are most suitable for early forcing, producing their neat and pretty spikes of flowers from November to January; they are well adapted for bouquets and vases, and are very fragrant.

	s. d.		s. d.
Per dozen	3s. & 3 6	Per 100	20s. & 25 0

NARCISSUS.

POLYANTHUS NARCISSUS.

These have the fragrance of the Jonquils, and are useful for in-door decoration; they are of easy culture, and can be forced early. The *Double Roman* is very desirable for early blooming; two or three bulbs are recommended to be planted in one pot, so as to produce a fine mass of flowers.

CYCLAMEN PERSICUM.

Too much can scarcely be said in favour of the superb varieties of this plant, of which the old *C. persicum* is the type, whether they are regarded as objects for the ornamentation of the greenhouse or conservatory, or for table decoration, for which their compact floriferous character eminently fits them. The flowers are also extremely useful for bouquets, and when plucked, if kept in water, they will last in freshness and beauty some weeks.

ASTILBE BARBATA.

GENERALLY, BUT ERRONEOUSLY, KNOWN AS

HOTEIA JAPONICA, AND SPIRÆA BARBATA.

Cannot be too highly appreciated as a decorative plant for early forcing, its pretty erect shining green foliage, surmounted by numerous beautiful and graceful panicles of white inflorescence, giving the whole plant an elegant appearance, and rendering it at once most pleasing and useful for decorative purposes.

Strong imported clumps, 9s. and 12s. per dozen.

SPIRÆA PALMATA.

One of the most beautiful hardy plants in cultivation, with deep purple red stems and branches, and crimson-purple broad corymbs of flowers. It is a native of Japan, and was discovered and introduced by Mr. Fortune. 12s. per dozen.

DIELYTRA SPECTABILIS.

Strong clumps of this graceful and well known plant for early forcing.

Price, 6s. and 9s. per dozen.

IRIS.

ENGLISH (I. anglica or Xiphioides).

For brilliancy of colour and fine vigorous foliage the English Iris takes rank amongst the handsomest of flowering bulbs. They greatly resemble the Spanish Iris in style of growth, attaining a height of about 2 feet, and produce, during June and July, a succession of large and beautiful flowers.

	1 0

SPANISH (I. hispanica or Xiphium).

The varieties in this section are perfectly distinct, and produce their rich self and parti-coloured flowers about a fortnight earlier than *Iris anglica*.

HERBACEOUS (I. germanica).

This exceedingly handsome and useful species possesses many attractions ; the varieties are hardy and evergreen, the flowers large, of rich and varied colours, most exquisitely veined and reticulated.

— FLORE PLENO	1s.	9s.	60s.
— SPLENDENS (LEOPOLDII), bright orange-scarlet, large dark spots; exceedingly attractive; this and the double-flowered var. are the most handsome of the <i>tigrinum</i> section	1s. 6d.	12s.	
— VENUSTUM	1s. 6d.	12s.	
— WALLICHIANUM			
— WASHINGTONIANUM, this noble Lily inhabits the western slope of the Californian Sierra Nevada; the flowers are white, slightly flushed with lilac, and sweet- scented	2/6 & 3/6	24/ & 30/	& 36/

Good and varied selections of Lilies made at 12s., 18s., 30s. and 42s. per dozen.

AMARYLLIS.

This deservedly popular family cannot be too highly recommended. The ease with which they are cultivated and the gorgeously beautiful flowers they produce at almost any season, make them most desirable in any collection. By gradually drying the bulbs they can be put to rest at any time during the year, and then when required, if started in a gentle heat they quickly develop their large lily-like blossoms, which are of various colours, generally embracing crimson, white and red, scarlet, rose-flaked, striped white and crimson, with various shades of colours.

AMARYLLIS, choice selections of good sorts, 3, 4 and 6 guineas per dozen.

AMARYLLIS BELLADONNA (The Belladonna Lily).

This beautiful hardy bulb is imported early in September; their large handsome blush flowers richly flushed with rosy purple, render them extremely useful for greenhouse and conservatory decoration. 6s., 9s. and 12s. per dozen; 40s., 60s. and 80s. per 100.

BEGONIAS.

HANDSOME-FLOWERED, TUBEROUS-ROOTED SECTION.

Those marked () are double-flowered varieties.*

The following novel and beautiful varieties will be found admirably adapted for the summer and autumn decoration of the Greenhouse and Conservatory; for they produce in the utmost profusion magnificent flowers of very large size, and great variety in colour. They do not require stove cultivation, but will succeed well in a greenhouse. The tubers rest during the winter months, similar to Gloxinias, and can be easily re-started into growth in the spring.

These can be sent in boxes by post.

Selections of good varieties of Handsome-flowered Begonias can be made by
 Mr. W. B. at 18s., 30s. and 42s. per dozen.

EUCODONIAS.

These exceedingly pretty hybrid Gesneraceous plants have nicely tinted ornamental foliage and extremely beautiful flowers, which are freely produced on small plants. The flowers are nearly the size and form of a drooping Gloxinia, but have the soft colouring and elegant markings of some of the attractive Tydas. 1s. and 1s. 6d. each, according to sorts.

GESNERAS (NÆGELIAS).

The value of Gesneras as decorative plants can scarcely be over-estimated. Most of them have rich velvet-like foliage, which, in the respective kinds, varies from green to crimson. If only grown for the foliage they are very attractive, but they produce splendid pyramidal spikes of blossom, which are extremely handsome. Originally, however, the principal colour was orange-scarlet; now, as the result of fertilisation, there are various colours and shades, added to which the spotting on the flowers of some of the varieties is extremely pretty. Selections of good varieties at 30s. and 42s. per dozen.

NEW AND CHOICE GLOXINIAS.

Those marked thus (*) have drooping flowers.

Choice selections made by Mr. W. B. at 18s., 30s. and 42s. per dozen.

GLOXINIA INSIGNIS, this distinct variety produces its flowers during the autumn and winter; colour bluish lilac, marked with a large crimson blotch at the base of the tube. 2s. 6d.

GLOXINIA MACULATA SCEPTUM, a magnificent hybrid, with extra large erect cordate foliage; it produces a rigid terminal inflorescence, exceeding twenty inches in height, which bears majestically its large, clear lilac, well-formed blooms. 2s. 6d.

TYDÆAS.

These can be cultivated so as to produce an abundance of bloom throughout the winter, their flowering season principally depending on the time of year their tubers are started into growth. With a little management a succession of blooming plants can be had nearly throughout the year. 18s., 24s., 30s. and 42s. per dozen, according to sorts.

— — RUBRO-OCULATA. { rooted Orchids.	5s. &	7 6
CALLA, <i>vide</i> Richardia.		
CALLIPHURRIA HARTWEGIANA		7 6
— SUBEDENTATA	per doz., 12s.	1 0
CALLIPRORA LUTEA (<i>flava</i>), a summer-flowering bulb, producing a cluster of yellow flowers		0 6
CALOCHORTUS ALBUS	} per doz., 18s.	
— BENTHAMII		
— CERULEA		
— LILACINUS		
— MAUVEANUS		
— VENUSTUS		
CAMASSIA ESCULENTA, bluish purple	per doz., 2s. 6d. ; per 100, 15s.	
CANARINA CAMPANULATA, an ornamental greenhouse plant, with fleshy roots, and producing numerous orange coloured flowers		3 6
CANNAS, these striking foliage plants are most effective for sub-tropical gardening and border grouping. They are extremely useful for summer decorative purposes, being exceedingly ornamental and attractive	per doz., 12s., 18s. & 30s.	
CHIONODOXA LUCILLIÆ, this is one of the most beautiful of bulbous plants, and perfectly hardy; it combines the habit of a handsome Squill with the brilliant colours of <i>Nemophila insignis</i> . Introduced from Asia Minor	per doz., 6s.	
CHLIDANTHUS FRAGRANS, a greenhouse bulb, producing fragrant trumpet-shaped yellow flowers	per doz., 3s.	0 4
CIENKOWSKIA KIRKII, this handsome and interesting plant is a native of Eastern Tropical Africa; its blossoms are exceedingly attractive and beautiful; they are freely produced on a many-flowered scape, and are of a soft purplish rose colour, with a bifid golden spot in the centre. It has received a First Class Certificate from the Floral Committee of the Royal Horticultural Society	21s. &	31 6
COLCHICUM AGRIPPINÆ (<i>variegatum</i>), rose, spotted with purple	per doz., 2s. 6d.	
— AUTUMNALE (<i>Autumn Crocus</i>), rosy lilac	„ 1s. 6d.	
— — ALBUM, white	„ 2s. 6d.	
— — FL. PLENO, white		3 6
— BYZANTINUM		0 6
— CROCIFLORUM		2 6
COMMELINA TUBEROSA (<i>caelestis</i>), rich blue	per doz., 4s.	0 6
— — ALBA, white	„ 4s.	0 6
CONVALLARIA MAJALIS (<i>Lily of the Valley</i>), <i>vide</i> page 9.		
CRINUM AMABILE		10 6
— AMERICANUM	2s. 6d. &	3 6
— ARENARIUM		10 6
— AUSTRALE, this bears the name of Botany Bay Lily, and is an ornamental bulbous plant, requiring greenhouse temperature. The bulbs are smooth, thick, and cylindrical. The flowers, which are very fragrant, are numerous, from ten to fifteen in an umbel, each attached by a pedicel longer than the ovary, and consisting of a long slender tube, and a spreading or recurved limb of six white segments		5 0
— CAPENSE ALBUM		1 6
— — ROSEUM		1 6
— COMMELYNI, this has been imported from British Guiana, and is a comparatively small growing kind, very showy, and much better adapted for pot-culture than the larger sorts; the flowers are white streaked with purple, handsome, and effective		7 6

**CRINUM PEDUNCULATUM PACIFICUM.**

A noble species, known as the Wedding Lily, introduced from Lord Howe's Island, producing immense umbels of deliciously scented, pure white blossoms. The individual flowers are from four to five inches in diameter, and as many as from twenty to thirty are produced in each umbel. The plant is of bold habit, with lanceolate recurved leaves and somewhat cylindrical-shaped bulbs. The delightful fragrance of its large and handsome heads of chaste blossoms makes this plant a most desirable acquisition. 10s. 6d., 15s. and 1 guinea.

— of sorts, <i>vide</i> page 18.		
GLADIOLUS, of sorts, <i>vide</i> page 10.		
GLORIOSA (METHONICA) PLANTII	2s. 6d. &	3 6
— SUPERBA, the flowers of this tuberous-rooted plant are very handsome, and from their large size, and effective orange and scarlet colours, always attract considerable attention		3 6
GLOXINIA, <i>vide</i> page 19.		
GODWINIA GIGAS, this produces only a solitary leaf, and after that has died off, the flower spathe makes its appearance, both leaf and spathe being of gigantic dimensions. The petiole has a beautifully mottled metallic surface, brimstone-yellow, barred and striped with purple, giving it the appearance of a snake standing erect		10 6
GRIFFINIA BLUMENAVIA, rich purple flowers, with flesh coloured centre		7 6
— HYACINTHINA MAXIMA, white, striped with sky-blue	7s. 6d. &	10 6
HÆMANTHUS KALBREYERI		7 6
— PUNICEUS, scarlet	2s. 6d. &	3 6
— TIGRINUS, orange		3 6
HEMEROCALLIS DISTICHA FL. PLENA, reddish orange		2 6
— FLAVA, yellow, sweet-scented		0 9
— FULVA (<i>Crocus</i>), orange		0 9
— FLORE PLENO, double flowering		1 0
— GRAMINEA, yellow		1 0
— KWANSO FL. PLENO, yellow		1 6
— FOLIS VARIEGATIS, yellow flowers, and beautifully variegated foliage		2 6
HIPPEASTRUM, <i>vide</i> Amaryllis.		
HYACINTHUS CANDICANS, a beautiful hardy plant, flowering in July and August, and producing large spikes of pendant bell-shaped flowers	per doz., 4s.	

KÄMPFERIA GILBERTII.

KÄMPFERIA GILBERTII, a fleshy-rooted perennial, with attractively variegated foliage, introduced from the East Indies. From the succulent roots are annually produced a tuft of oblong-lanceolate deep green leaves, which are slightly undulated at the margin, and bordered by a broad and very conspicuous band of white. The purple and white flowers are peculiar in form as often occurs in the Zingiberaceae order 7 6

ZINGIBER OFFICINALE (<i>Ginger</i>)		3 6
— ZERUMBET		3 6

LAVATERA ARBOREA VARIEGATA.

Price, 2s. 6d. per packet of 30 seeds; plants, 3s. 6d. each; per dozen, 30s.

The *Journal of Horticulture*, in noticing this decorative border plant, which received a First Class Certificate from the Royal Horticultural Society, in May 1882, thus writes of it:—"Very rarely indeed does it fall to our lot to figure for the first time and introduce to our readers a border plant so striking in appearance as the Variegated Tree Mallow. When Mr. Smith first sent us leaves of his new acquisition, we were almost startled by their markings; the irregular mixture of very dark green, pale greenish grey, and pure white, impart to the plant a remarkable appearance."

Mr. Smith, from whom Mr. W. B. purchased the entire stock, wrote respecting it:—"I have proved that it comes true from seed, but it must be understood that it is something like the Variegated Maize, does not show much variegation in a young state. The plants from seed sown last spring are now beautifully variegated. There is not the least doubt but that it will be one of the finest and most effective plants for large beds and borders that has ever been introduced. Last winter it stood out without injury; it is best, however, to pot some up, and keep them in a cool house, and turn them out in spring, but a slight protection outside would be sufficient to keep the plants undisturbed in beds or borders, which is desirable, for in spring of the second year the beauty of such plants is beyond description."

SUNDRIES.

TOBACCO PAPER, best manufacture. Per lb., 1s. 6d.

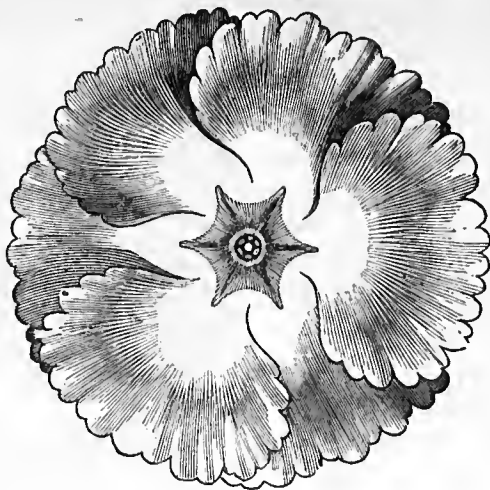

ARCHANGEL MATS, large size and best quality. Each, 2s. 6d.

RUSH GRASS (RAPHA), for tying. Per lb., 2s.

MR. W. BULL wishes to remark that his attention is especially directed to the introduction of New, Rare and Beautiful Plants, and that he will be happy to make arrangements with *Botanists* or *Naturalists* going abroad for the transmission of *Plants, Seeds, &c.*; and will be glad to purchase or make arrangements for the sending out of any first-rate *Seedling Varieties of Plants* that may be raised by *Amateurs or Gardeners* in this country.

SEED FROM PRIZE STRAINS.

PRIMULA

SINENSIS.

PRIMULA SINENSIS FIMBRIATA MONT BLANC.—Unrivalled in the pureness of its snowy white, densely fringed flowers, which are of great size and substance. 5s. per packet.

PRIMULA SINENSIS FIMBRIATA SPLENDIDA.—The flowers of this magnificent strain are a deep crimson, beautifully fringed, and of immense size and substance. 5s. per packet.

Mr. W. BULL has great confidence in offering the above unrivalled strains of Chinese Primulas. They are unsurpassed in the great breadth and substance of their beautifully fringed flowers, which are borne in immense heads, growing well above the foliage. They are of fine habit, and can be highly recommended.

PRIMULA SINENSIS FIMBRIATA ALBA
PRIMULA SINENSIS FIMBRIATA RUBRA
PRIMULA SINENSIS FIMBRIATA FILICIFOLIA ALBA
PRIMULA SINENSIS FIMBRIATA FILICIFOLIA RUBRA } Extra choice.

These varieties possess most elegantly fringed edges, and are offered with the greatest confidence. 1s. 6d. and 2s. 6d. per packet.

PRIMULA SINENSIS FIMBRIATA "Bull's Premier Mixture." 1s. 6d. and 2s. 6d. per packet.

Seed of Mr. WILLIAM BULL's select strain of this useful and favourite plant is now offered in mixture containing all the new and most distinct colours and varieties; the many unsolicited testimonials received point conclusively to the fact of its being appreciated among growers as of unusual excellence. To distinguish this from the ordinary mixture of *P. alba* and *rubra* generally supplied, Mr. W. B. designates this choice mixture as above.

PRIMULA SINENSIS FIMBRIATA KERMESINA SPLENDENS.—A fine variety, with rich crimson-coloured flowers. 1s. 6d. and 2s. 6d. per packet.

PRIMULA SINENSIS FIMBRIATA "VILLAGE MAID."—White striped with rosy carmine; splendid variety. 1s. 6d. and 2s. 6d. per packet.

PRIMULA SINENSIS FIMBRIATA ALBA FL. PL.
PRIMULA SINENSIS FIMBRIATA ROSEA FL. PL.
PRIMULA SINENSIS FIMB. KERMESINA SPLENDENS FL. PL.

These double Primulas are a valuable acquisition, especially to cut from, as they do not drop their flowers like the single varieties. 3s. 6d. and 5s. per packet.
